I. Basis of the report

1. With regard to the **elements** of the international application (*Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)*):

Description, Pages

1-3 as originally filed

Claims, Numbers

1-10 as originally filed

Drawings, Sheets

1/3-3/3 as originally filed

2. With regard to the **language**, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language: , which is:

- ☐ the language of a translation furnished for the purposes of the international search (under Rule 23.1(b)).
- ☐ the language of publication of the international application (under Rule 48.3(b)).
- ☐ the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. The amendments have resulted in the cancellation of:

- ☐ the description, pages:
- ☐ the claims, Nos.:
- ☐ the drawings, sheets:

To Chapter V

V.1 Independent Claim 1

DE-A-4141793 (document D1) shows (see Fig. 10):

A steering pivot comprising a pivot pin 55 providing an integrally formed radially inner race 34 defining a circumferentially extending inner raceway, and a cage (see column 5, lines 14 - 16) retaining therein at spaced locations rolling elements 35 which contact the inner raceway.

The subject-matter of claim 1 differs therefrom in that the cage is retained relative to the pivot by means of a clip connection.

Therefore, the subject-matter of the present claim 1 seems to fulfil the provisions of Art. 33 (2) PCT (Novelty) in view of the state of the art as mentioned in the search report.

The problem to be solved by the present invention may be regarded as to reduce the assembly time and cost.

The feature - clip connection - is not contained in or does not seem to be rendered obvious from the state of the art as mentioned in the search report.

The present claim 1 seems therefore to fulfil the provisions of Art 33 (3) PCT.

V.2. Claims 2 to 10 depending on Claim 1

Claims 2 - 10 depending on claim 1 and having as subject-matter special and advantageous embodiments of the invention according to claim 1 seem, together with its subject-matter, to fulfil the provisions of Art. 33 and Rule 6 PCT.

V.3. Industrial Applicability

Claim 1 seems to fulfil the provisions of Art. 33 (4) PCT, because corresponding steering pivot can be produced and used at least in the automotive industry.
